

ARUN KARTHICK P

Data Analyst | ETL Pipelines | SQL | Python | Power BI | Tableau

Tirupur, India • +91 78069 18951 • arunp061106@gmail.com • [linkedin.com/in/arun-karthick-p-824491314](https://www.linkedin.com/in/arun-karthick-p-824491314) • arunp061106.github.io/Arjun-Portfolio

PROFESSIONAL SUMMARY

Detail-oriented Computer Science Engineering student (3rd Year, CGPA 8.56) with a strong foundation in data analysis, statistical techniques, and data visualization. 1st Place winner at the DND Data Arena 24-Hour Sprint, demonstrating the ability to deliver end-to-end data analysis under pressure — from data ingestion and modelling to insight communication. Technical Manager at Data Forge, the official Data Science Club at SRMIST Trichy. Proficient in Python (Pandas, NumPy), SQL, Power BI, and Tableau; experienced in building ETL pipelines, predictive models, interactive dashboards, and automated reporting workflows that transform complex datasets into actionable business insights for cross-functional stakeholders.

TECHNICAL SKILLS

Data Analysis & Statistics: Python (Pandas, NumPy, Matplotlib, Seaborn), Statistical Analysis, Predictive Modelling, Root Cause Analysis, Trend Identification

Data & Reporting: SQL, Power BI, Tableau, Advanced Excel (VLOOKUP, PivotTables, Scenario Analysis), Interactive Dashboards, ETL Pipelines, Data Quality & Validation

Programming: Python, SQL, DAX, Power Query (M-Query), RapidMiner

Analytics & Insights: Data Pipeline Optimization, Workflow Automation, Predictive Forecasting, Cohort Analysis, Data Storytelling, Business Intelligence

Tools & Platforms: Streamlit, Plotly, DuckDB, Scikit-Learn, Apache Parquet, GitHub, MS Office Suite, Alteryx

ACHIEVEMENTS & RECOGNITION

1st Place — DND Data Arena 24-Hour Sprint (Social Media Sentiment Track, Data n Dreads)

Competed solo against teams in a rigorous 24-hour hackathon. Delivered full-cycle data analysis — ingestion, modelling, dashboard structuring, and insight communication — within a strict deadline. Certificate issued by DND Data n Dreads.

HackerRank SQL Gold Badge — Validates advanced proficiency in structured querying and relational data analysis.

Organised 24-Hour Hackathon at SRM Institute — Led end-to-end event coordination demonstrating planning, leadership, and cross-team collaboration.

WORK EXPERIENCE

Data & Analytics Intern | Right Angle Solutions | Jun 2026 – Jul 2026

- Managed spreadsheet-based financial and operational data for the Finance & Accounts team, validating accuracy across business records to support reliable reporting.
- Prepared structured business reports and organized operational data using advanced spreadsheet techniques, improving clarity for stakeholder decision-making.
- Performed data validation and basic data analysis on financial and operational datasets using spreadsheets to identify discrepancies and support reporting accuracy.

Digitalization & Documentation Volunteer | Southern Railway, Coimbatore Junction — Under Station Manager (Commercial) | 20 Days, 2026

- Digitalized and documented railway station records, developing a lightweight application to streamline record-keeping and support future scalability.
- Developed an complete offline application for the file categorization and Promoted the Rail One App among station stakeholders, supporting adoption of a key digital initiative for passenger services.
- Assisted station staff with documentation workflows, ensuring accurate, organized, and easily retrievable digital records.

LEADERSHIP & CLUB EXPERIENCE

Technical Manager | Data Forge — Data Science Club, SRMIST Trichy | 2024 – Present

- Lead technical initiatives, workshops, and project mentoring for the official Data Science Club at SRM Institute of Science & Technology, Tiruchirappalli.
- Drive end-to-end event management for data science events, hackathons, and competitive analytics activities for club members.

PROJECT EXPERIENCE

TATA IPL EcoDot Analytics | Python | Streamlit | Scikit-Learn | 2026

- Engineered an end-to-end Python ETL pipeline processing 1,200+ raw ball-by-ball match JSON files (290k+ delivery rows) to extract tournament-wide dot ball statistics, standardizing team franchises and 20+ stadium name variations.
- Designed a dynamic multiplier mapping system converting dot balls into tree plantation metrics, tracking 640k+ trees and calculating carbon offset potential per IPCC environmental standards.
- Developed a Random Forest Regressor using Scikit-Learn to forecast matchup-level dot-ball counts and environmental contributions based on venue, team, and seasonal factors.
- Built a premium dark-themed glassmorphic Streamlit dashboard featuring a proprietary "Green Impact Score" ranking metric, custom Plotly visuals, and responsive micro-animations.

Tools: Python, Streamlit, Scikit-Learn, Plotly, Pandas, Apache Parquet, PyArrow, ETL Pipelines, Predictive Modeling, Custom UI Styling

SYNAPSE — Synthetic Data Intelligence Platform | Python | DuckDB | Streamlit | Scikit-Learn | 2025

- Architected an end-to-end synthetic data pipeline simulating real-world datasets (e-commerce, IoT, fintech) using a layered event → silver → gold architecture with DuckDB, integrating CTGAN-based generation with a stability fallback engine.
- Engineered a composite Trust Score metric combining distribution similarity, correlation fidelity, and ML utility validation (train-on-real/test-on-synthetic); generated datasets up to 50,000+ rows with runtime optimized to under 2 minutes.
- Achieved ML utility scores of ~0.7; built an interactive Streamlit dashboard with real-time insights and dataset download capability, resolving deployment challenges across local and cloud environments.

Tools: Python, Pandas, NumPy, DuckDB, Scikit-Learn, Plotly, Streamlit, CTGAN, ETL Pipelines

Brand Pulse Monitor (SentimentScope) — DND Winning Dashboard | HTML5 | Chart.js | PapaParse | Vanilla JS | 2024

- Delivered a clarity-first HTML/CSS/JS dashboard analysing 732 social media posts across Twitter, Instagram, and Facebook covering 10+ countries — winning 1st Place at DND Data Arena 24-Hour Sprint — with in-browser CSV parsing (PapaParse) and 8 interactive chart types using Chart.js 4.4.1.
- Designed a live Auto Story Headline feature that auto-narrates the full data story and updates with every filter change — no backend, no frameworks, zero installation required.

Tools: HTML5, CSS3, Vanilla JavaScript, Chart.js, PapaParse, GitHub Pages

Freelancer Platform Funnel & Growth Paradox Analysis | SQL | PostgreSQL | Power BI | 2025

- Diagnosed the 'Growth Paradox' — why marketplace scale doesn't always translate into revenue efficiency — analysing revenue efficiency vs. growth trends, supply-demand imbalance, and funnel conversion leakage across 35,000+ interaction records using PostgreSQL and Power BI.
- Built scalable cohort-driven ETL workflows and an interactive Power BI decision dashboard to support strategic growth optimization scenarios for non-technical business stakeholders.

Tools: SQL, PostgreSQL, Power BI, Power Query, DAX, Funnel Analytics, Cohort Analysis

Digital Wellbeing AI Dashboard | Python | Streamlit | AI-Powered | 2025

- Built an AI-powered Streamlit dashboard analyzing digital wellbeing patterns from user behaviour data, surfacing actionable insights on screen time, app usage, and focus habits with real-time visualizations (github.com/arunp061106/Digital-wellbeing-AI-dashboard).

Tools: Python, Streamlit, Pandas, Matplotlib, Seaborn, AI APIs

INDUSTRY EXPERIENCE (SIMULATION PROGRAMS)

- Tata (Forage) — GenAI Powered Data Analytics Virtual Experience
- Deloitte (Forage) — Data Analytics Virtual Experience
- EduSkills — Google AI-ML Virtual Internship

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- HackerRank Advanced SQL Certification
- Microsoft ETL Fundamentals Certification

EDUCATION

B.Tech Computer Science & Engineering | SRM Institute of Science & Technology, Tiruchirappalli
CGPA: 8.56 • 3rd Year (Class of 2028) • Jun 2024 – Jul 2028
